Benchmarks: What Students Should Know and Be Able to Do

### **SAS - Curriculum Framework (PA Core: Mathematics / Algebraic Concepts / 6th Grade)**

#### **Long Term Transfer Goals**

1. Make sense of and persevere in solving complex and novel mathematical problems.
2. Use effective mathematical reasoning to construct viable arguments and critique the reasoning of others.
3. Communicate precisely when making mathematical statements and express answers with a degree of precision appropriate for the context of the problem/situation.
4. Apply mathematical knowledge to analyze and model situations/relationships using multiple representations and appropriate tools in order to make decisions, solve problems, and draw conclusions.
5. Make use of structure and repeated reasoning to gain a mathematical perspective and formulate generalized problem solving strategies.

#### **Big Idea**

- o Mathematical relationships among numbers can be represented, compared, and communicated.

#### **Essential Question**

- How is mathematics used to quantify, compare, represent, and model numbers?
