LTSD's VPN (Virtual Private Network)

A VPN is a network that allows you to access your school's network drive from home.

1. To use the VPN, double click this icon on your desktop:

2. This box appears and you will need to key in the following (shown below): **ASAvpn.Itsd.k12.pa.us**

(you will need to key this in the first time only, it will appear automatically in the future)

- 2a. Warning: If an error message appears, click on change settings and uncheck block VPN settings
- 3. Click Connect. You will see this warning click Connect Anyway.

A	Security Warning: Untrusted VPN Server Certificate!
	AnyConnect cannot verify the VPN server: ASAvpn.ltsd.k12.pa.us
	Certificate does not match the server name. Certificate is from an untrusted source. Certificate has an invalid date.
	Connecting to this server may result in a severe security compromise! Security Risks Explained
	Most users do not connect to untrusted VPN servers unless the reason for the error condition is known.

5. Another warning box will appear, click Accept.

Cisco AnyConnect						
	Warning!!!	^				
This system is for use by authorized personnel only! If you are not authorized to use this system, please log off now. All use and attempted logins to this system will be monitored at all times. Deliberate attempts to compromise the security of this system will be handled by the prope authorities						
	Accept Disconnect	×				
	authorities.	~				

6. This box will appear (briefly) in the bottom right corner of the screen. When it appears, you are connected to the VPN and will have access to your network drive.

TROUBLESHOOTING: if you do not see your network drive listed:

You may need to click on "This PC"

When you click on "This PC", it will expand and you should see your network drive (or at least the teacher's drive which should allow you to get to your network drive)

TIP: If you click on the teacher's network drive and get an error message, wait a few seconds and try it again. Sometimes, it can be uncooperative at first!

When you are finished using the VPN you should click on disconnect so that you go back to using your home network – which is probably faster.
